KerioCloud

Communication Made Easy

Stay connected anytime, anywhere with Kerio Cloud hosted email, messaging and voice services. Kerio Cloud provides a reliable and scalable business communication platform in a high-performing secure cloud environment.

- ✓ **Business-class email** with a custom domain name, shared calendars and scheduling, contact management, tasks, notes, public and shared folders and instant messaging.

- ✓ **User access** from a broad range of devices and email clients.

- ✓ **Direct push synchronization** to keep data current across all devices and ready for offline access.

- ✓ **Enterprise-class** voice solution with video calls, auto attendant, call queues, conference calling, call forwarding, parking, pickup, recording and more.

- ✓ **Secure** managed cloud service providing the utmost in reliability, scalability, disaster recovery and performance.

Kerio Cloud simplifies IT management by eliminating the need to deploy and manage an on-premises email or voice solution. Intuitive and easy to use, Kerio Cloud delivers the level of security and support you expect from a professional email and voice service. Kerio Cloud also layers comfortably on top of your current IT environment without sacrificing functionality or requiring end-users to make changes to the way they work.
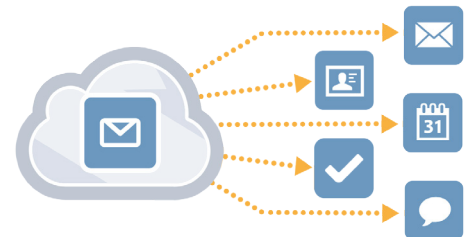

Deliver Full-featured Business-Class Email & More

- Use your own domain name in email addresses.

- Email is integrated with shared calendars and scheduling, contacts management, tasks, notes, shared and public folders and instant messaging. Synchronize with direct push to your choice of mobile devices.

- Kerio Connect Client via a web browser allows users to see the presence of colleagues, chat in real-time, organize meetings and securely compose richly formatted email.

- Utilize the Kerio Connect Desktop App for Mac with all the features of Kerio Connect Client in a stand-alone application.

- Full support for Outlook (Windows and Mac), native apps for Mac OS, and any other IMAP or POP compliant email client.
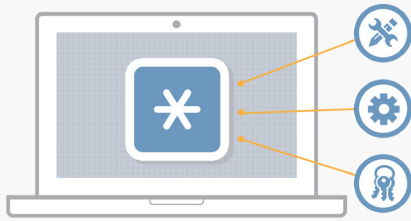

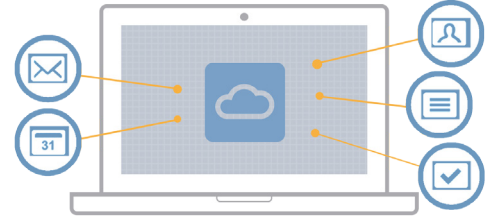

Implement Easily in Any IT Environment

- Offer the flexibility and choice business users want. Support each user's choice of mobile devices and standards-based email clients.

- Enjoy full-featured web mail from modern browsers via the Kerio Connect Client.

- Enable user self-setup in seconds with Kerio Connect auto-configuration tools.

- Setting up mail applications and mobile devices is so simple that end users can configure them without any help.

- Migrate from your current email solution using free tools and services.

- Leverage an IT expert through the extensive Kerio partner network.

Streamline Team Communication

- Organize contacts into as many groups as you wish and share them with coworkers.

- Create tasks and notes, sort them into groups, assign tasks to and share notes with colleagues.

- Schedule events, check attendee availability, and reserve conference rooms or other shared resources.

- Create recurring events and receive meeting reminders in your inbox.

- Enjoy timesaving features like full-text search, address auto-complete, quick preview of attachments and draft auto-save.

VoIP Phone System in the Cloud

- Powerful voice capabilities including call handling and routing typically associated with expensive phone systems.

- Make and receive calls to and from your office number from your mobile device or computer with supported softphones anywhere, anytime.

Rock-Solid Infrastructure, Managed by World-Class Experts

- Enjoy peace of mind with a professionally managed infrastructure that offers infinite and immediate scalability, high availability, rapid failover, and cost-effective storage.

- Say goodbye to business disruptions caused by IT issues. Kerio handles uptime concerns, disaster recovery planning, product upgrades, and security issues on your behalf.

- Resolve issues quickly with 24X7 service and support.

Secure Your Data, Protect Your Privacy

- Reduce inbox clutter of unwanted messages with multiple layers of spam filtering.

- Protect your network from viruses, Trojans, worms, spyware and adware while minimizing impact on memory and system performance with the integrated anti-virus engine.

- Get powerful identity and content protection with SSL encryption and S/MIME.

- All your data remains private, and is never used for ad targeting or product development.

Get Started in Minutes
